

# Fiber Optic Cable

## Side-Emitting

BritePak Diamond *Stranded Cable*

BritePak Diamond fiber creates an unbreakable decorative linear look of diamonds along its length. Available in two different sizes for use in low light applications such as aisle way lighting. Recommended in lengths up to 100'. Both ends should be terminated. Can be cut and harnessed at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Minimum bend radius is 4x outer diameter. Priced Per Foot.
